

COMFORT FOR DRIVER AND PASSENGERS

The Otokar Vectio T becomes part of the fleet of SAI Treviglio, with an eye to the passengers' comfort and making the ride easier

A special delivery for SAI Treviglio took place in early July. An Otokar Vectio T 290 coach passed through the Mauri Bus System, importer of the Turkish brand for Italy, to get integrated into the company's coach hire fleet.

The special feature of this 10.1-metre bus is a MAN Euro VI engine delivering 290 horsepower mated to the ZF EcoLife automatic transmission, instead of an ordinary manual transmission. The other distinctive feature implies 39 extendable and reclining leather seats.

This is a much more comfortable solution taking into consideration that the Vectio T could install two other seat rows, reaching a total of 43 + 1 + 1 seats.

The vehicle is fitted as standard with the following equipment: a 24 kW climate system with a front box, a heating convector, open luggage racks, audio-video equipment, refrigerator, rear view camera and parking sensors. A trailer hitch is also included. The fleet of SAI Treviglio consists of 20 touring coaches and other 80 buses for suburban transport services.

This Otokar Vectio T coach supplied to the Italian company is the second delivered one. An 18-metre Otokar Kent will follow after, becoming the first one to arrive in Europe.
