

MAN WINS BUS OF THE YEAR 2015

MAN Lion's City GL CNG 18.75-metre with Euro VI engine awarded "Bus of the Year 2015" title.
It's 18.75 metre long and powered by Euro VI engine

THE "Bus of the Year 2015" is an articulated CNG bus by MAN. Specifically, the 18.75 metre long Lion's City GL CNG articulated MAN bus with Euro VI CNG engine.

The jury, consisting of a team of the European trade press, was persuaded by its environmental friendliness, its power and efficiency thanks to the CNG Euro VI engine that significantly reduces fuel consumption and CO2 emissions, approximately 17 percent less compared to those produced by diesel buses.

The vehicle was also appreciated for its transport capacity up to 142 passengers, and for the care of the interior finishings made with quality materials and LED lighting

strips, tickets validation via smartphone, free Wi-Fi hotspot Internet access and individually programmable screens.

The Lion's City GL CNG debuted in Italy

at the Transpotec Logitec fair in Verona last year. Since then, a dozen units have been put into service on the ATV lines in Verona and one, in the airport version, is deployed in Venice on the ranks of local transport company

ACTV. More orders will be delivered shortly in Northern Italy.

This model is the longer version of the popular MAN Lion's City series which in 2014 is celebrating a major milestone: the first decade after its market introduction and 16,000 units sold worldwide. ●
